Resources

Download finished source code from Udemy from Resources in this lecture

Download the source code from https://github.com/Palusko/BookApiProject

- You can download incremental steps of the project as it was being created (there are 33 commits)

Some of the lectures contain downloadable resources (this is optional, all resources are also presented on the video)

If you have a question, please make sure you check out Q&A on Udemy first. Please do not message me any course-related questions! Ask all questions on the Q&A so other students can also participate in the discussion.

I am not able to answer any questions about errors and issues related to your computer hardware or configuration or set up.
